

# **WILLPOWER**

## **Technologies**

- **Share Point Server overview and installation**

1. Introduction to Share point Server
2. Planning and Architecture of Share point Server
3. Introduction to various versions of share point servers
4. Share point Server Architecture and its internal components
5. Limitations and difference between MOSS and WSS
6. Configuring default databases
7. Prerequisites of share point server
8. Installation of Share point Server

- **Share point Server Technologies**

1. Introduction to web application
2. Introduction to share point high level components
3. Introduction and using of libraries and list items
4. Managing libraries and lists
5. Create and managing workspaces, sites and pages
6. Security trimming

- **Document Management and content management**

1. Creating and managing document libraries
2. Creating and managing form libraries
3. Creating and managing wiki page
4. Creating and managing Data links library

- **User communications, lists and custom list items**

1. Announcements
2. Contacts
3. Discussion board
4. Links
5. Calendar
6. Tasks, project tasks
7. Issue tracking and survey
8. Custom list
9. alerts

- **Users permissions and access levels**

1. Introduction to security
2. Access level
3. User permission and management
4. Sites, pages, Master pages, Share point Server Designer and branding
1. Creating custom site as templates
2. Creating custom pages and designing
3. Creating Master pages
4. Creating designer based pages
5. Creating designer based web parts
6. Creating designer based database web parts & web services based web parts

- **Introduction to InfoPath**

1. Understanding InfoPath
2. Use the system templates
3. Create custom templates
4. Create xml based templates and publish to Moss
5. Create Database templates and publish o Moss

6. Create Web service based templates and publish to Moss

- **Sites customization**

1. Site themes customization

2. Site templates customization

- i. Custom templates

- ii. Uncustom templates

- **Form based authentication**

1. Introduction to FBA

2. Creating and configuring FBA

3. Creating FBA Users

4. Authenticate FBA users

- **Shared Services Providers (SSP)**

1. Introduction to SSP

2. Creating SSP

3. Default SSP and Changing Association of SSP

4. Using MY Site and My links

5. User Profiles

6. Excel Services

7. Office server search

8. Business Data Catalogs

9. Creating and Configuration of BDC Web parts

- **Introduction to web parts**

1. Web part architecture

2. Create and deploy web part

3. Create web part and deploy with server controls

4. Debugging web parts

- **Introduction to Share point API**

1. Using Share point Server object model

2. Access sites, Document Libraries or List items

3. Update list items from data base and flat files

- **Work Flows**

1. Workflows introduction

2. Creating workflows

3. Accessing workflows

4. Managing workflows

- **Administration**

1. Share point web application management

2. Share point site management

3. InfoPath forms services

4. Office share point server shared services

5. Application security

6. External service connections

7. Workflows management

8. Topology and services

Security configuration
